SUMMARY

Computer Science student with full-stack development and cloud architecture experience. Proven ability in web development, problem-solving, and delivering client-focused technology solutions.

EXPERIENCE

Deloitte Technology Consulting Virtual Internship

Forage **January 2025 - March 2025**

- Analyzed 5+ client case studies across retail and technology sectors to identify digital transformation opportunities.
- Designed client-focused technology solutions aligning with business goals, resulting in 20% improved operational efficiency recommendations.
- Collaborated with cross-functional team of 4 consultants to develop data-driven strategies and deliver actionable insights.

AWS Cloud Architecture Job Simulation

Forage **April 2024 - June 2024**

- Designed scalable AWS cloud architectures for 3+ enterprise scenarios following Well-Architected Framework best practices.
- Implemented security controls, IAM policies, and automated deployment pipelines reducing manual configuration time by 40%.
- Optimized cloud infrastructure costs by 25% through strategic use of EC2, S3, and Lambda services.

PROJECT

Full Stack Movie Recommendation App (Nan Mudhalvan Project)

string

- Analyzed 5+ client case studies across retail and technology sectors to identify digital transformation opportunities.
- Designed client-focused technology solutions aligning with business goals, resulting in 20% improved operational efficiency recommendations.
- Collaborated with cross-functional team of 4 consultants to develop data-driven strategies and deliver actionable insights.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science and Engineering

Ponjesly College of Engineering • Nagercoil, Tamil Nadu • Graduating 2027

- Analyzed 5+ client case studies across retail and technology sectors to identify digital transformation opportunities.
- Designed client-focused technology solutions aligning with business goals, resulting in 20% improved operational efficiency recommendations.
- Collaborated with cross-functional team of 4 consultants to develop data-driven strategies and deliver actionable insights.

SKILLS

Java, HTML, CSS, JavaScript, React, MongoDB, SQL

Web developer,problem Solving, Critical Thinking, Leadership, Team Collaboration
